WHAT (Ethical Values)
Normative Content
Normative Theories, Taxonomies & Frameworks
Operational Ethical or Alignment Criteria
Normative Target Specification or Reference Basis
WHOSE Values (Stakeholders)
Stakeholder-Level
Individual
Group
Organization
Society
Stakeholder Role
Value Source
Affected Stakeholder
Design/Governance Actor
WHICH (Engines)
Learning-based
LLM/Conversational-AI-based Alignment Mechanisms
Human Preferences and Feeback-Driven Alignment
Model-Steering & Adaptation
RL-based Alignment
Task-Specific ML/DL Approaches
Non-Learning-based
Explicit Symbolic, Normative & Formal Mechanisms
Hybrid
Generative & Multimodal Hybrid Systems
Human-Robot-Interaction (HRI)
Learning Symbolic Ethical Reasoning & Control
WHEN (Lifecycle Stage)
Pre-Training
Value-Bearing Data Construction
Normative Specification & Constitution Construction
Ethical Environment & Reward-Space Design
In-Training
Supervised & Preference-based Updates
Reward, Value Representation & Belief Learning
Ethically Constrained Objective & Policy Learning
Post-Training
Constitutional Adherence Assessment
Post-Learning Value-based Model Selection
Runtime & Inference-Time Integration
Output Oversight, Verification & Revision
Prompt, Profile & Retrieval Conditioning
Internal Activation & Decoding Interventions
Online & Action-Time Value Mediation
Post-Deployment Operations & Iterations
HOW (Technique)
Explicit Natural-Language Guidance
External Artefact Storage
Inference-time Latent Steering
Training-time Parameter Editing
Feedback-based Preference Optimization
Loss & Objective Shaping
Formal Constraints & Environment Design
Value Signal Construction
WHY (Objective/Goal)
Ethical Conformance & Norm Adherence
Safety, Harm & Bias Mitigation
Personalized, Pluralistic & Context-Sensitive Alignment
Competing-Objective Reconciliation
Robust, Stable & Generalizable Alignment
Efficient & Scalable Alignment
Inspectable & Controllable Alignment
Alignment Understanding & Formal Grounding
Alignment Evaluation & Assurance
